

RAUNAK SHUKLA

FOUNDER RESUME | PRODUCT, TRUST SYSTEMS & AI-ENABLED EXECUTION

Noida, India | rsworks.in@gmail.com | [linkedin.com/in/raunak-shukla](https://www.linkedin.com/in/raunak-shukla) | raunakshukla.netlify.app | syinq.com

FOUNDER PROFILE

Co-Founder & CEO of SYINQ, a verified campus network for ride coordination, campus commerce and community. I work across product strategy, UX, growth, operations, fundraising, compliance and AI-enabled execution. My strength is converting messy real-world behaviour into clear systems, trusted workflows and products that ship.

SHIPPED, NOT SLIDES

Live product available across iOS and Android.

TRUST AS INFRASTRUCTURE

Verification, ride proof and accountability built into the flow.

END-TO-END OWNERSHIP

Product, design, GTM, operations and fundraising under one founder lens.

BUILDING IN PUBLIC

Shares practical views on AI, product, startups, design and technology.

SYINQ - FOUNDER & CEO

Rasync Global Solutions Private Limited | September 2024 - Present

Building India's verified campus commute network, starting with peer-to-peer ride coordination and expanding into campus marketplace and community infrastructure.

- **Took SYINQ** from problem discovery and product research to an incorporated company and a live release on the Apple App Store and Google Play.
- **Built the trust and safety layer** around university verification, driver and vehicle verification, OTP-based Proof-of-Pool, SOS, live tracking, ratings and ride accountability.
- **Designed the complete rider and host lifecycle**, including discovery, matching, no-match watchlists, fare logic, requests, boarding, live-trip states, completion and feedback.
- **Built and led** a lean cross-functional team across engineering, product, design and marketing, with sprint systems, decision logs, metrics and execution cadence.
- **Owned fundraising**, accelerator and grant applications, investor material, university outreach, partnerships, compliance, legal coordination and company operations.
- **Embedded AI** into daily execution using Claude Code, Copilot, Cursor, ChatGPT, n8n and Notion for research, prototyping, technical review, automation and founder operations.

HOW I THINK & OPERATE

SYSTEMS OVER SCREENS

I design identity, incentives, trust, edge cases and operations, not only interfaces.

FIELD REALITY FIRST

Start with the painful user moment, observe behaviour and cut scope until the core loop works.

AI AS LEVERAGE

Use agents to compress research and execution, while keeping judgment, taste and accountability human.

CAMPUS-FIRST, WORLD-SCALE

Treat campuses as dense trust networks that can become a repeatable infrastructure layer.

SECURITY-BY-THINKING

Apply cybersecurity instincts to product permissions, verification, privacy and failure modes.

DISCIPLINED ITERATION

Prefer fast learning, measurable progress and continuous refinement over polished theatre.

REPRESENTING SYINQ

Bennovate 3.0 - Bennett University

Represented SYINQ alongside co-founder Rupesh Shandilya and Abhi Tailor; showcased the venture, competed in Spark Tank, met investors and mentors, and opened internship conversations.

UP StartinUP ecosystem & startup showcases

Represented the company through Bennett Hatchery-linked platforms and startup showcases, including the UP International Trade Show, to build visibility, feedback and institutional relationships.

Founder ecosystem conversations

Carried SYINQ into PW School of Startups, accelerator and grant programs, and strategic conversations with technology leaders on market sequencing, product-market fit and emerging-market scale.

SELECTED FOUNDER MILESTONES

2024	Incorporated Rasync Global Solutions Private Limited and formalised SYINQ as a venture.
2024	Represented SYINQ at Bennovate 3.0 with Rupesh Shandilya and Abhi Tailor across the startup showcase, Spark Tank and internship fair.
2025	Graduated, launched SYINQ across iOS and Android, and received the Vice Chancellor Silver Medal for Innovation & Entrepreneurship.
2025	Showcased SYINQ through the Bennett Hatchery ecosystem at the UP International Trade Show in Greater Noida.
2026	Shortlisted for IIT Kanpur AIIDE Cohort 5 and expanded funding, grant, accelerator and university-partnership outreach.
2026	Engaged with Transsion leadership on market sequencing, product-market fit and emerging-market scale.

EARLIER VENTURES & EXPERIENCE

Founding Member CrownCast	2024
Creator monetisation and brand campaign platform	
- Led product and design across mobile and web experiences, translating creator and brand workflows into prototypes, dashboards and feature roadmaps. - Worked on creator partnerships, campaign workflows and the product layer connecting brands with digital creators.	
Cybersecurity Research Intern SecureNet Innovations	Sep 2023 - Dec 2023
Remote	
- Performed penetration testing, vulnerability assessments and network security audits, then documented mitigation recommendations. - Researched emerging threats and supported security policy development, compliance thinking and team knowledge sharing.	

RECOGNITION, CAMPUS LEADERSHIP & DESIGN

Vice Chancellor Silver Medal	Innovation & Entrepreneurship, Bennett University.
Bennovate E-Summit Leadership	Co-convened the entrepreneurship summit and helped coordinate the event team and execution.
Campus Design & Event Communication	Led visual identity, campaign design and communication across the BU Sports Committee, entrepreneurship activities and college organisations; also contributed to Mood Indigo operations at IIT Bombay.
PW School of Startups	Bennett-nominated participant; pitched SYINQ and completed startup, finance and design-thinking sessions.

TECHNICAL & PRODUCT FOUNDATION

DRONE DELIVERY USING BSSID Designed a Wi-Fi triangulation approach for navigation where GPS coverage is unreliable.	VULNERABILITY SCANNER Built an automated scanning concept using port scanning and service enumeration.
CONTACT-BASED SOCIAL UTILITY Designed a private, location-aware social product built around existing trusted contacts.	WEB3 MARKETPLACE Explored peer-to-peer transactions using Solidity, React and Ethereum.

FOUNDER LENS & INTERESTS

WORLD & TECHNOLOGY Studies AI systems, maps, cybersecurity, mobility, product strategy, world technology, geopolitics and how digital platforms reshape coordination and power.	BUILDER DISCIPLINE Maintains a structured routine around building, continuous learning, communication, personal branding, physical training and deliberate self-improvement.
---	--

EDUCATION, CERTIFICATIONS & CAPABILITIES

B.TECH - COMPUTER SCIENCE ENGINEERING Cybersecurity specialisation Bennett University 2021 - 2025 CGPA: 8.4	- EC-Council Certified Network Defender (CND) - AWS Academy Graduate - Cloud Foundations - AWS Cloud Quest: Cloud Practitioner - TCS iON Career Edge - Young Professional - DeepLearning.AI - Improving Deep Neural Networks
--	--

Capabilities: Product strategy, UI/UX, user research, roadmapping, sprint management, trust systems, campus GTM, fundraising, partnerships, AI workflows, cybersecurity, Mapbox, APIs, analytics, GitHub and cloud foundations.
